The Infrastructure profile is publicly available

Intelligent Systems Research Center

AUREL VLAICU UNIVERSITY OF ARAD

Our Research Center Intelligent Systems is dedicated to advancing in the global knowledge based of intelligent systems research.

We are working in the next main areas:

- Systems Theory, Automate Systems, Intelligent Systems and Circuits.
- Micro/nano system modelling
- Process modeling and analysis
- Computational Intelligence
- Intelligent transportation systems
- Artificial pancreas
- Renewable energies

Infrastructure:

- Computer networks;
- Greenhouses - models
- Different laboratory devices
- FPGA circuit

Domains of activity

- Electrical and Optical Engineering Facilities
- Software Service Facilities
- Energy Engineering Facilities (non-nuclear)
