Are we ready to match donor and recipient in liver transplantation?

IR Marino - Liver Transplantation, 2006 - Wiley Online Library

On March 10, 2006, according to the United Network for Organ Sharing, there were 17,233 patients awaiting deceased donor liver transplantation (OLTx) in the United States. The same source indicates that 6,121 OLTx were performed in 2005 in this country. 1 The average US ...

Increased donor risk: who should bear the burden?

S Feng - Liver Transplantation, 2009 - Wiley Online Library

Without a doubt, the greatest challenge facing solid organ transplantation today is the shortage of organs. Transplant waiting lists extend miles beyond the transplant volume, and this leaves many patients who would benefit from transplantation stranded, without access to what ...

DATABASE, DATA CLEANING, DATA ANALYSIS, GRADUATION,
LABOUR MARKET

АННОТАЦИЯ:

“Aurel Vlaicu” University of Arad took part in a large scale monitoring study that focused on the university graduates all-over the country. The national study was performed for 18 universities targeting the graduates and their insertion on the labour market. A national database was set-up and data-processing was performed, involving the entire amount of data. After consolidating the results, the central database was split- up and delivered to the universities for their own data-processing and conclusions. This paper presents the data and a set of results extracted from the study, namely the part of data and data-processing that refers to the graduates of “Aurel Vlaicu” University of Arad and their post-graduate professional activity. The aim of the study is to make correlations between the acquired competencies through the university education and the professional level that correspond to the graduates' position on the labour market - by getting hired, developing an own business and/or studying further...
