

Talcurile Parintilor sirieni ne pot ajuta sa intelegemnefirescul si artificialitateacrisparii cu care exegeza aacademica o priveste pe cea patristica dar si lipsa de „temeiuri patristice” a fricii cu care metodele exegetice modern sunt intampinate in unele medii care se doresc riguros traditionale. Lectura rabdatoare a intregului volumne va arata ca aceasta crisper e urmareea fie a unui intellectualism care nu poate fi deposit fie a unor scrupule antiretice de factura.

The interpretations of the Syrian Fathers can help us understand the unnaturalness and artificiality of the tension with which academic exegesis views patristic exegesis, as well as the lack of "patristic foundations" for the fear with which modern exegetical methods are met in some circles that strive to be rigorously traditional. A patient

reading of the entire volume will show that this tension is either the result of an intellectualism that cannot be abandoned or of some anti-rhetorical scruples of a certain nature.
