

Copyright

Describes the rights related to the publication and distribution of research. It governs how authors (as well as their employers or funders), publishers and the wider general public can use, publish and distribute articles or books.

In order for JPE to publish and disseminate research articles, we need publishing rights. This is determined by a publishing agreement between the author and JPE. This agreement deals with the transfer or license of the copyright to JPE and authors retain significant rights to use and share their own published articles. JPE supports the need for authors to share, disseminate and maximize the impact of their research and these rights, in JPE proprietary journals* are defined below:

For subscription articles	For open access articles
<p>Authors transfer copyright to the publisher as part of a journal publishing agreement, but have the right to:</p> <ul style="list-style-type: none"> • Share their article for Personal Use, Internal Institutional Use and Scholarly Sharing purposes, with a DOI link to the version of record on CrossReferences. (and with the Creative Commons CC-BY-NC-ND license for author manuscript versions) • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work. 	<p>Authors sign an exclusive license agreement, where authors have copyright but license exclusive rights in their article to the publisher**. In this case authors have the right to:</p> <ul style="list-style-type: none"> • Share their article in the same ways permitted to third parties under the relevant user license (together with Personal Use rights) so long as it contains a CrossMark logo, the end user license, and a DOI link to the version of record on CrossReferences. • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work.
